

## Questions to Ask About Chemotherapy Treatment

What is the goal of chemo for my cancer?

What are the risks of chemotherapy?

Which chemotherapy drug(s) are I am going to be given?  
If there will be more than one chemotherapy drug, what is the reason for selecting the specific agents?

How will I get the chemo, how often, and for how long?

Where will I get chemo?

How soon can I expect any side effects to occur and how long will they last? What can I do to prepare for any side effects?

What can I do to get ready for treatment and decrease the chance of side effects?

Will I need to change my diet in any way?

My activities? My work? Exercise?

What are the chances that the chemo will work?

How will I know if the chemo is working?

If the insurance company asks for a second opinion, or if I would like to get one, can you suggest someone for me to see?
